HOUSE REPUBLICANS

REP. JASON SMITH, REPUBLICAN LEADER

**When asked to defend a massive spending agenda, President Biden said:**

***"What would they have me cut? What would they have me leave out?"***

**We are glad you asked, Mr. President.**

### **Solyndra 2.0**

Remember Solyndra? The solar panel company was the poster child for spending boondoggles under the Obama Administration – receiving \$500+ million from Obama’s economic stimulus program and then swiftly going bankrupt.

Overseeing the Obama economic stimulus program: then-Vice President Biden.

Now Biden is giving a \$500 million loan to First Solar – a solar company being sued by investors [“claiming the company lied to shareholders about the effectiveness and financial viability of its solar modules.”](#)

Just another bad bet by Biden? Or is there more here? After all: “...First Solar's billionaire owner Walton in 2020 [contributed \\$300,000 to the Biden campaign](#) and \$100,000 to the DNC.”

This whole solar panel deal is not looking good in the light of day.

Thankfully our Republican friends at the Oversight Committee [are on the case](#), shining some much needed sunlight on this debacle.

Stay tuned for more.
